

SUMEET KUMAR RAJ

Software Engineer | C++ | JavaScript | React.js

+91 98614 74824 | sumeetkumarraj2612@gmail.com | Bengaluru, India | LinkedIn | GitHub | LeetCode | Portfolio

Technical Skills

- **Languages:** C++, JavaScript (ES6+)
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Vite
- **Backend:** REST APIs
- **CS Fundamentals & Web:** Data Structures & Algorithms, OOP, DBMS, Operating Systems
- **Tools:** Git, GitHub, Vercel

Projects

Room-Sync

React.js, Vite, Tailwind CSS, React Router, Framer Motion

[Live Demo](#) | [Source Code](#)

- Developed a responsive hotel booking web application using React.js and Vite, enabling users to discover stays through destination, date, and guest-based search workflows.
- Built reusable, component-based interfaces for Home, Explore, My Bookings, Dashboard, and authentication flows, improving code organization and maintainability.
- Implemented client-side routing with React Router and integrated Clerk authentication to support login and sign-up user flows.
- Applied semantic HTML and responsive design practices to achieve 91 Accessibility, 96 Best Practices, and 92 SEO scores in Google PageSpeed Insights.

Price Craft

React.js, Vite, Tailwind CSS, JavaScript (ES6+)

[Live Demo](#) | [Source Code](#)

- Developed a responsive e-commerce shopping cart using React.js, implementing product search, filtering, sorting, cart management, and multi-step checkout workflows.
- Engineered a rules-based discount engine supporting percentage, flat, BOGO, and minimum-cart-value discounts with coupon stacking, conflict handling, and automatic invalidation.
- Implemented predictable cart state management using React useReducer and Context API, with discrete actions for adding, removing, updating, and clearing cart items.
- Designed the discount logic as a pure, testable function and validated edge cases including non-stackable coupons, odd BOGO quantities, minimum-cart thresholds, and negative-total prevention.

Stories Web App (24-Hour Story Feature)

React.js, JavaScript, HTML5, CSS3

[Live Demo](#) | [Source Code](#)

- Developed an Instagram-inspired **24-hour Stories feature** using React.js, implementing story creation, viewing, autoplay, and interactive navigation.
- Implemented **timestamp-based expiry logic** to automatically invalidate stories after 24 hours and used LocalStorage for client-side data persistence.
- Built a responsive, component-based interface with **viewed/unviewed indicators, click/swipe navigation, and animations** to improve the story-viewing experience.

Achievements

- **Smart India Hackathon 2025 – Runner-up, Hardware Edition:** Developed a research-driven **hybrid stealth coating for UAVs and defense assets**, contributing to material research, electromagnetic simulation, prototyping, and technical validation while collaborating with a multidisciplinary team under strict time constraints.

Education

Dayananda Sagar College of Engineering, Bengaluru

B.E. in Electronics and Communication Engineering | CGPA: 7.6 | 2023–2027
